

Priyanka More

Senior Software & Platform Engineer | [LinkedIn](#) | more.piyapatil@gmail.com | 0615797994 | Bangkok, TH.
Portfolio Website: <https://priyankapatilmore.github.io/portfolio>

Senior Software & Platform Engineer with 8+ years of experience building distributed systems and cloud platforms across Java, Go and Python. Experienced in designing and delivering microservices, modernizing legacy monolithic systems, building event-driven architectures with Apache Kafka, and automating cloud infrastructure with Kubernetes and Terraform, and designing LLM orchestration pipelines. Experienced in driving cross-team API standards, production observability, and engineering quality.

SKILLS

Languages:	Java 17/21+, Go, Python.
Backend & Architecture:	Spring Boot/Cloud, Gin, Microservices, Distributed Systems, REST/gRPC APIs, Event-Driven Architecture, API Design.
Cloud & Platform:	Microsoft Azure, AWS, GCP, Alibaba Cloud, Kubernetes, Docker, Terraform, CI/CD, GitHub Actions.
Data & Messaging:	Apache Kafka, Azure Event Hubs, PostgreSQL, MS SQL Server, MongoDB, Redis, SQL Optimization, Dimensional Modeling.
Observability & QA:	Datadog, Prometheus, Grafana, JUnit, xUnit, SonarQube, Automated Testing.
AI Engineering:	RAG, Local LLMs, Model Context Protocol (MCP), Vector Databases (ChromaDB), LangChain, Gemini/OpenAI APIs.

EXPERIENCE

ExxonMobil Sr. Platform Engineer & Full Stack Developer	Dec 2022 - Present Bangkok, Thailand
- Designed and developed 8+ polyglot microservices (Java, Golang), migrating legacy monolithic features to a decoupled architecture that allowed for independent scaling. - Built event-driven data pipelines using Kafka, Azure EventHub, processing 1M+ transactions daily. - Provisioned hybrid cloud infrastructure across Azure and Alibaba Cloud, orchestrating workloads with Kubernetes and automating infrastructure using Terraform and GitHub Actions. - Established system observability using Datadog, Prometheus, and Grafana, automated alerting dashboards that improved issue detection and reduced Mean Time To Recovery (MTTR). - Integrated security tools into development workflows, mentored 4 engineers, and established a 75% unit test coverage baseline to improve engineering quality. - Designed secure API integrations for data exchange between backend services and enterprise SaaS platforms (Salesforce, Azure Data Factory).	
Demeter ICT Company Limited. Senior Application Developer	Aug 2019 - Nov 2022 Bangkok, Thailand
- Developed backend services and RESTful APIs using Java, Spring Boot, and Node.js. - Integrated CRM systems (Zendesk) with cloud databases across GCP and AWS.	

- Built Interactive Voice Response (IVR) systems and Dialogflow chatbots to process customer requests in real time.
- Wrote automation Python scripts for data extraction, operational workflows, and API testing.

BaanBanchi Co., Ltd.

Full Stack Engineer

Sep 2018 - Jul 2019

Bangkok, Thailand

- Developed an accounting and payroll application for employee tax calculations and financial records.
- Designed relational database schemas, tables, and stored procedures in MS SQL Server.
- Built user interfaces with WPF, HTML, and Bootstrap, connecting them to backend .NET services.

ADDITIONAL PROJECTS

Open Source Project

AI & Platform Engineering

Feb 2025 - Present

Bangkok, Thailand

- Built a privacy-focused RAG system using Python, local LLMs (Ollama), and ChromaDB, utilizing the Model Context Protocol (MCP) to standardize LLM-to-vector storage communication.
- Implemented role-based data retrieval to strictly enforce access controls on sensitive technical documentation, and containerized the entire AI stack with Docker.

Seanet Singapore

Software & Data Engineer Freelance

Feb 2022 - Jun 2022

Singapore

- Refactored legacy code into modern microservices and REST APIs, and developed React.js interface.
- Wrote SQL transformations using CTEs, window functions, and stored procedures for data cleansing and dimensional modeling.

EDUCATION

Asian Institute of Technology

Master of Engineering: Major in Computer Science

Jan 2017 - Dec 2018

Pathum Thani, Thailand

- Research Grade: Excellent (A)

Jawaharlal Nehru Technological University Hyderabad

Bachelor of Technology: Major in Computer Science

Sep 2013 - Dec 2016

Hyderabad, Telangana, India
